

RE: Lacombe Fish and Game Association Dock Project

December 9, 2021

To Whom It May Concern:

On December 1, members of the Lacombe Fish and Game Association and Team Jigger Foundation Executives presented a potential significant facility improvement to the very popular Len Thompson Fishing Pond located in the City of Lacombe. The pond is stocked with more than 6000 trout annually and also the location of the Guinness World Record Largest Fishing Lure, a tourist attraction.

The project aims to greatly increase the accessibility, capacity, safety and attractiveness to what is currently a small, 15 year old floating dock that is in poor condition and declining quickly. The potential new, permanently installed dock is proposed to be constructed in the winter of 2022 / 2023.

Upon review of the information, this project would seem to be of benefit to the citizens of Lacombe County. Our council and administration are in support of this project concept.

No official requests for financial support have yet been submitted to the County of Lacombe. However, due consideration and a proper evaluation would be given to such a request.

Sincerely,

Barb Shepherd
Reeve – County of Lacombe
