

Certificate of Treatment

To whom it may concern

This is to certify that the below wood products have been Pressure-treated in accordance with the conditions outlined in the Canadian Standards Association 080 (Current Edition – March 2008) for Usage Category (UC) 4.1.

The preservative used in this treatment is certified to be **“CCA”** Chromated Copper Arsenate.

The material in this order was treated and Incised to a total retention of **“0.40”** pounds per cubic foot (pcf).

The components were then processed through a patented “fast-fix” treatment for 90 minutes washing the wood with hot water at 800 gallons per minute and at a temperature of 125F. The washed “fixed” components to allow them to condition and surface dry before dispatch.

**Sold to: Produits Forestiers Trans Canada
Henryville, Quebec**

**Contents: T31216XiFro – 3x12 Hemlock Rough – 360pc/16’
T31220XiFro – 3x12 Hemlock Rough – 720pc/20’**

Quality Control inspected after treatment.

I certify the above to be true and valid information.
